

We have constructed a curriculum with the intent to enable:

Christ to be at the centre of all we do, reflected through our mission: We learn, explore, challenge and respect; **sharing Christ's love through all that we do.**

**Children to develop a love of learning, become life-long learners and make a positive contribution to society.**

**The unique child to be at its heart;** recognising and working with pupils' individual needs, starting points and their local context. Opportunities are made to celebrate every child's achievements and success.

**The wellbeing of all pupils to be at the forefront** allowing pupils to develop a positive sense of self together with high levels of engagement and involvement.

High quality teaching and learning based on cognitive science supporting **pupils to recall and build on prior learning.**

**'Know More, Remember More and Do More'**

**Enrichment of pupils' cultural capital** through memorable experiences to further their personal development and cultural understanding of the wider world.

Pupils to **improve academic achievement**

Opportunities for pupils to develop their **communication skills, creativity, problem solving and resilience across the curriculum**

**Promote healthy relationships with others and a positive sense of self**
